update culture and the afterlife of digital writing explores neglected circulatory writing processes to better understand why and how digital writers compose, revise, and deliver arguments that undergo sometimes constant revision. John R. Gallagher also looks at how digital writers respond to comments, develop a brand, and evolve their arguments all post publication with the advent of easy to use websites ordinary people have become internet writers disseminating their texts to large audiences. Social media sites enable writers and audiences to communicate back to them instantly and often even professional writers work within interfaces that place comments adjacent to their text privileging the audience's voice thus writers face the prospect of attending to their writing after they deliver their initial arguments. *Update Culture and the Afterlife of Digital Writing* describes the conditions that encourage published texts to be revisited. It demonstrates through forty case studies of Amazon reviewers, redditors, and established journalists how writers consider the timing, attention, and management of their writing under these ever-evolving conditions. Online culture from social media to blog posts requires a responsiveness to readers that is rarely duplicated in print and requires writers to consistently reread, edit, and update texts a process often invisible to readers. This book takes questions of circulation online and shows via interviews with both writers and participatory audience members that writing studies must contend with writing's afterlife. It will be of interest to researchers, scholars, and students of writing studies and the fields of rhetoric, communication, education, technical communication, digital writing, and social media as well as all content creators interested in learning how to create more effective posts, comments, replies, and reviews.

Facebook in just a few years has become one of the central tools people use to communicate with each other in everyday life. However, the perceived freedom of action on the site and the actual processes that are permitted in Facebook's set up don't always match up. In this book, this gap is examined. This book identifies the interrelations between user text actions and the software environment framing them. It takes a critical perspective on Facebook and develops a model that grants methodological access to complex interlaced practices incorporating media, text, and literacies. It shows Facebook users employing idiosyncratic and Facebook-specific literacy practices and gives weight to the larger hypothesis of the software service as an ideological setting designed to calculate and standardize human behaviour. Specifically, the book examines text, action, and automation within Facebook to determine how the software service intervenes in the communicative flow between among profile owners and profile recipients. This is cutting edge work and of huge importance to modern fields of discourse analysis and computer-mediated communication.
