writing for visual media looks at the fundamental problems a writer faces in learning to create content for media that is to be seen rather than read it takes you from basic concepts to practice through a seven step method that helps you identify a

communications problem think it through and find a resolution before beginning to write through successive exercises writing for visual media helps you acquire the basic skills and confidence you need to write effective films corporate and training videos documentaries web sites psas tv shows nonlinear media and other types of visual narratives you ll explore your visual imagination and try out your powers of invention the companion web site enriches the content of the printed book with video audio and sample scripts it includes scripts and the video produced from them visual demonstrations of concepts and an interactive illustrated glossary of terms and concepts please visit focalpress com cw friedmann 9780240812359 click on the interactive content tab and follow the registration instructions

stefan brands proposes cryptographic building blocks for the design of digital certificates that preserve privacy without sacrificing security as paper based communication and transaction mechanisms are replaced by automated ones traditional forms of security such as photographs and handwritten signatures are becoming outdated most security experts believe that digital certificates offer the best technology for safeguarding electronic communications they are already widely used for authenticating and encrypting email and software and eventually will be built into any device or piece of software that must be able to communicate securely there is a serious problem however with this unavoidable trend unless drastic measures are taken everyone will be forced to communicate via what will be the most pervasive electronic surveillance tool ever built there will also be abundant opportunity for misuse of digital certificates by hackers unscrupulous employees government agencies financial institutions insurance companies and so on in this book stefan brands proposes cryptographic building blocks for the design of digital certificates that preserve privacy without sacrificing security such certificates function in much the same way as cinema tickets or subway tokens anyone can establish their validity and the data they specify but no more than that furthermore different actions by the same person cannot be linked certificate holders have control over what information is disclosed and to whom subsets of the proposed cryptographic building blocks can be used in combination allowing a cookbook approach to the design of public key infrastructures potential applications include electronic cash electronic postage digital rights management pseudonyms for online chat rooms health care information storage electronic voting and even electronic gambling

this collection of papers investigates the most recent debates about individualism and holism in the philosophy of social science the debates revolve mainly around two issues firstly whether social phenomena exist sui generis and how they relate to individuals this is the focus of discussions between ontological individualists and ontological holists secondly to what extent social scientific explanations may and should focus on individuals

and social phenomena respectively this issue is debated amongst methodological holists and methodological individualists in social science and philosophy both issues have been intensively discussed and new versions of the dispute have appeared just as new arguments have been advanced at present the individualism holism debate is extremely lively and this book reflects the major positions and perspectives within the debate this volume is also relevant to debates about two closely related issues in social science the micro macro debate and the agency structure debate this book presents contributions from key figures in both social science and philosophy in the first such collection on this topic to be published since the 1970s

this book investigates the interrelations between aesthetics ethics and politics in a variety of visual media forms ranging across art installations film and television interactive documentaries painting photography social media and videogames an international mix of emerging and established authors with interdisciplinary expertise explores how different ethical questions political implications and aesthetic pleasures arise and shape one another in distinct visual media investigating themes such as the use of cinema as a medium for ethical and political thought how documentary subjects both conceal and reveal truth the new ethical challenges arising from interactive media and the role of images in responding to political events and trauma this is a groundbreaking work about the interrelations of aesthetic ethical and political values in visual media

a quarterly review of philosophy
